DETAILED ACTION

It has been discovered that the previous office action, mailed 12/16/03, inadvertently did not include consideration of additional instant claims 60-65. This office action is hereby being mailed to include consideration of instant claims 60-65. The response time is also hereby restarted as of the mailing date of this office action.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission, filed on 9/29/03, has been entered.

Applicants' arguments, filed 9/29/03, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claims 36-44, 47-51, 54, and 60-65 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 1631

This rejection is reiterated and maintained from the previous office action, mailed 4/25/03, however, now directed to the amendment which responded to this rejection as previously set forth but still with NEW MATTER in the response. Specifically, the limitation which contains NEW MATTER is that of the phrase "do not comprise an optical tag" as in claim 36, line 7, and claim 54, line 8. Applicants have pointed to the specification at pages 18-19 for support. Consideration of these pages revealed that the only characterization with written basis regarding the instant invention is the lack of an optical signature. The optical tag is only disclosed regarding what were previous inventions and not that the absence of such an optical tag characterizes the instant invention. Therefore, the amendment directed to "optical tag" contains NEW MATTER. It is suggested to amend the claims to recite "optical signature" as the negative limitation.

OBVIOUSNESS-TYPE DOUBLE PATENTING

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1631

Claims 36-65 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 27-39 of copending Application No. 09/748,706 in view of Walt et al. (P/N 6,023,540; already of record).

This rejection is reiterated and maintained from the previous office action, mailed 4/25/03, as not having been argued and therefore still deemed proper.

This is a provisional obviousness-type double patenting rejection.

It is acknowledged that an IDS has been filed 9/29/03. It, however, has been processed into an image which is unreadable. A reprocessing has been requested and will result in execution of said IDS with a copy sent with the next office action.

Claims 16-20 are allowed.
